India's data centre capacity to reach 2 GW by end of 2026, says CBRE report

by tele.net
07 Oct 2026 11:45 IST

According to a report by CBRE, India's data centre market is expected to reach 2 gigawatts (GW) of total operational capacity by the end of 2026. Approximately 130 megawatts (MW) of new capacity was added in the first half of 2026, with over 200 MW anticipated to go live in the second half. Mumbai anchored this expansion, accounting for 94 per cent of new supply added in the first half.

Subscribe

The sector attracted approximately $38 billion in investment commitments in the first half of 2026, pushing cumulative commitments since 2021 to around $173 billion. Hyperscale and colocation investments constituted nearly 62 per cent of these cumulative commitments, with over 15 per cent tied to artificial intelligence (AI)-linked demand, reflecting the growing impact of AI on the sector's investment trajectory.

India advanced to Asia Pacific's leading data centre markets category in 2026, joining Japan, Australia and Mainland China, reflecting the increasing scale, maturity and strategic importance of its ecosystem. Data centres ranked as the fourth most preferred asset class in CBRE's 2026 Asia Pacific Investor Intentions Survey.

The share of Tier IV data centres in overall supply rose to 43 per cent in the first half of 2026, up from 21 per cent in 2024. Multi-city portfolios accounted for over 85 per cent of commitments in the first half. Domestic investors held the largest share of cumulative capital deployed since 2021 at 38 per cent, ahead of the United States at 27 per cent, while domestic developers contributed 48 per cent of new supply added in the first half, surpassing American and European players.

India’s telecom AGR rises 9.19 per cent to Rs 887.96 billion in June quarter, says TRAI PIR

by tele.net
13 Oct 2026 10:34 IST

According to the Telecom Regulatory Authority of India’s (TRAI) performance indicator report (PIR), India’s telecom sector recorded adjusted gross revenue (AGR) of Rs 887.96 billion in the April-June quarter of 2026, increasing 9.19 per cent year on year and 2.4 per cent quarter on quarter. Access services, covering mobile and fixed-line connectivity, contributed 83.85 per cent of the sector’s total AGR.

Reliance Jio led the access services segment with AGR of Rs [illegible], accounting for a 44.62 per cent market share. Bharti Group followed with Rs 298.03

billion and a 40.03 per cent share, while Vodafone Idea Limited (Vi) reported Rs 84.48 billion, accounting for 11.35 per cent. Jio's AGR grew 9.69 per cent year on year, compared with 10.19 per cent for Bharti Group and 8.27 per cent for Vi. State-owned Bharat Sanchar Nigam Limited (BSNL) recorded AGR of Rs 21.17 billion, up 2.80 per cent, with a 2.84 per cent share.

Licence fee collections increased 9.18 per cent year on year to Rs 171.03 billion. Meanwhile, the sector's gross revenue grew 10.50 per cent to Rs 1.07 trillion, although its quarterly increase was lower at 1.60 per cent.

The revenue growth coincided with an expansion in internet and broadband subscriptions. India's internet subscriber base reached 1.11 billion at the end of June 2026, while broadband subscriptions increased 2.03 per cent from March to 1.09 billion.

Average monthly mobile data consumption per data subscriber rose 6.32 per cent to 28.39 GB. Total mobile data traffic increased 8.30 per cent, even as operators' average revenue per GB declined 5.07 per cent to Rs 7.13.

Average monthly revenue per wireless subscriber reached Rs 187.12, registering growth of 1.19 per cent over the previous quarter and 3.11 per cent year on year. In contrast, average monthly voice usage declined 2.65 per cent to 933 minutes per subscriber.
