Research Highlights

As of November 2025, **the United States has 5,427 data centers**, making it the world's largest data center market by a significant margin. Globally, there are approximately **12,000+ operational data centers**, with the U.S. accounting for 45% of all facilities worldwide.

How many data centers does each country have?

The United States dominates global data center infrastructure with **5,427 facilities** as of November 2025, according to Cloudscene's comprehensive data center database. This represents nearly half of all data centers worldwide.

The top 10 countries by data center count are:

Rank	Country	Number of Data Centers
1	United States	5,427

Rank	Country	Number of Data Centers
2	Germany	529
3	United Kingdom	523
4	China	449
5	Canada	337
6	France	322
7	Australia	314
8	Netherlands	298
9	Russia	251
10	Japan	222

Top 10 Countries by Data Center Count (Nov 2025)

Amount of data centers by region

North America

North America hosts **5,767 data centers**, representing approximately 48% of global facilities. The region is dominated by the United States.

Country	Data Centers
United States	5,427
Canada	337
Cayman Islands	3
Total North America	**5,767**

Data Centers by Country: North America

Europe

Europe has **3,362 data centers** across 45 countries. Germany and the United Kingdom lead the region.

Country	Data Centers
Germany	529
United Kingdom	523
France	322
Netherlands	298
Russia	251
Italy	168
Poland	144
Spain	144
Switzerland	121
Sweden	95
Belgium	81
Austria	68
Ukraine	58
Ireland	55
Denmark	50
Finland	48
Norway	47
Turkey	35
Czech Republic	34
Romania	31
Latvia	27
Bulgaria	24
Luxembourg	23
Portugal	21
Lithuania	18

Country	Data Centers
Estonia	16
Hungary	15
Greece	14
Slovakia	14
Slovenia	13
Serbia	12
Croatia	9
Belarus	9
Moldova	7
Cyprus	6
Iceland	6
Macedonia	6
Malta	6
Georgia	4
Liechtenstein	2
Monaco	2
Gibraltar	2
Bosnia and Herzegovina	2
Azerbaijan	1
Albania	1
Total Europe	**3,346**

Data Centers by Country: Europe

Asia-Pacific

Asia-Pacific has **1,818 data centers**. China, Australia, and Japan are the regional leaders.

Country	Data Centers
China	449
Australia	314
Japan	222
India	153
Hong Kong	122
Singapore	99
Indonesia	88
New Zealand	83
Malaysia	62
South Korea	43
Thailand	42
Philippines	39
Vietnam	33
Kazakhstan	25
Taiwan	19
Pakistan	11
Bangladesh	7
Cambodia	7
Myanmar (Burma)	6
Uzbekistan	5
Papua New Guinea	4
Kuwait	4
Nepal	3
Sri Lanka	3
Iran	2
Afghanistan	1

Country	Data Centers
Laos	1
Bhutan	1
Total Asia-Pacific	**1,818**

Data Centers by Country: Asia-Pacific

South America

South America has **654 data centers**, with Brazil and Mexico accounting for 57% of the region's facilities.

Country	Data Centers
Brazil	197
Mexico	173
Chile	59
Colombia	41
Argentina	29
Peru	21
Panama	20
Puerto Rico	19
Guatemala	16
Ecuador	15
Costa Rica	13

Total South America	**654**

Data Centers by Country: South America

Oceania

Oceania has **401 data centers**, dominated by Australia.

Country	Data Centers
Australia	314
New Zealand	83
Papua New Guinea	4
Total Oceania	**401**

Data Centers by Country: Oceania

What is the global data center market size?

The global data center market was valued at **$527.46 billion in 2025** and is projected to reach **$739.05 billion by 2030**, growing at a 6.98% compound annual growth rate (CAGR), according to Statista.

However, data center infrastructure spending tells a more dramatic story. Gartner reported **$489.5 billion in data center systems spending for 2025**, representing a 46.8% increase from 2024's $333.4 billion. This explosive growth reflects the AI infrastructure boom.

Data center market size by region (2025)

Region	Market Size	% of Global Market
United States	$171.90B	33%
Europe	$89.67B	17%
China	$84.39B	16%
Rest of World	$181.50B	34%
Global Total	**$527.46B**	**100%**

Global Data Center Market Size by Region (2025)

How many hyperscale data centers exist globally?

There are **1,189 large hyperscale data centers globally** as of Q1 2025, with 504 additional facilities in planning and construction stages, according to Synergy Research Group.

The sector added 137 new hyperscale facilities in 2024 alone, with annual growth expected to continue at 130-140 new hyperscale data centers per year.

Amount of hyperscale data centers by country (top 10)

Country	Hyperscale DCs	% of Global Total
United States	642	54%

Country	Hyperscale DCs	% of Global Total
China	190	16%
Japan	71	6%
Germany	60	5%
United Kingdom	48	4%
Australia	36	3%
Canada	30	3%
Netherlands	24	2%
Singapore	21	2%
Ireland	18	2%
Other countries	49	3%
Global Total	**1,189**	**100%**

Hyperscale Data Centers by Country (Top 10)

Note: Hyperscale data centers are defined as facilities operated by hyperscalers (Amazon, Microsoft, Google, Meta, Alibaba, Tencent, etc.) that are typically larger than 10,000 square feet and consume more than 1 megawatt of power.

What is the total global data center capacity?

Global data center capacity reached **122.2 gigawatts (GW)** of installed IT power capacity as of Q1 2025, according to Synergy Research Group.

Data center GW capacity distribution by region

Region	IT Power Capacity	% of Global Total
United States	53.7 GW	44%
Europe	20.8 GW	17%

Region	IT Power Capacity	% of Global Total
China	19.6 GW	16%
Asia-Pacific (ex-China)	16.9 GW	14%
Latin America	6.1 GW	5%
Other	5.1 GW	4%
Global Total	**122.2 GW**	**100%**

Global Data Center IT Power Capacity by Region (Q1 2025)

Hyperscale operators currently control **44% of global data center capacity**, up from just 20% in 2017. This share is projected to reach **61% by 2030**.

How much do companies spend on AI data centers?

The four largest hyperscalers (Microsoft, Google, Amazon, and Meta) collectively plan to spend over **$370 billion on data center infrastructure in 2025**, up from $244 billion in 2024.

AI and cloud infrastructure spending by company (2025)

Company	2025 Spending	2026 Estimate	Primary Focus	Source
Amazon (AWS)	$125 billion	~$126–130B	Cloud & AI infrastructure	Amazon raised spending to $125B in Q3 2025, up from earlier $118B estimate

Company	2025 Spending	2026 Estimate	Primary Focus	Source
Microsoft	$88.7 billion (FY2025*)	$120B+ (FY2026**)	AI-enabled data centers	Microsoft spent $88.7B in fiscal 2025; Q1 FY2026 was $30B+
Google (Alphabet)	$91–93 billion	Higher (TBA)	AI, cloud, infrastructure	Alphabet raised 2025 capex; significant increase in 2026
Meta	$66–72 billion	~$100 billion	AI training infrastructure	Meta expects $66–72B in 2025; could hit $100B by 2026
Total	**~$371–379 billion**	**~$446B+**		

AI & Cloud Infrastructure Spending by Company (2025)

* Microsoft's fiscal year ends June 30

** Microsoft's FY2026 started July 1, 2025

McKinsey projects that **$6.7 trillion in cumulative capital expenditure will be required globally between 2025-2030** to meet data center demand, with $5.2 trillion dedicated to AI-specific infrastructure.

What are the largest recent data center investments?

The data center industry is experiencing unprecedented investment, with several projects exceeding $10 billion.

Major data center investments announced 2024-2025

Project	Investment	Location	Company
Stargate Initiative	$500B	Multiple U.S. sites	OpenAI/Oracle/SoftBank
Aligned Data Centers acquisition	$40B	U.S. (50+ campuses)	BlackRock consortium
AWS Georgia expansion	$35B	Georgia, USA	Amazon
Reliance AI Campus	$30B	Jamnagar, India	Reliance Industries
Microsoft UK commitment	$30B	United Kingdom	Microsoft
Brookfield/Data4 AI infrastructure	$21B	France	Brookfield/Data4
AWS Project Rainier	$11B	Indiana, USA	Amazon
AWS Mississippi complex	$10B	Mississippi, USA	Amazon
AWS Pennsylvania expansion	$10B	Pennsylvania, USA	Amazon
Meta Hyperion project	$10B	Louisiana, USA	Meta

Major Data Center Investments Announced (2024–2025)

How much electricity do data centers consume?

Global data centers consumed **415 terawatt-hours (TWh)** of electricity in 2024, representing approximately 1.5% of worldwide electricity demand, according to the International Energy Agency

(IEA).

The United States alone consumed **183 TWh in 2024**, accounting for 4.4% of total U.S. electricity consumption.

Data center electricity consumption by region (2024)

Region	Electricity	% of Regional Power
United States	183 TWh	4.4%
China	65 TWh	~1%
Europe	64 TWh	~2%
Japan	19 TWh	~2%
Rest of World	84 TWh	<1%
Global Total	**415 TWh**	**1.5%**

Data Center Electricity Consumption by Region (2024)

IEA projections show data center electricity demand will more than double to **945 TWh globally by 2030**, approaching 3% of total global electricity consumption.

Projected data center electricity consumption by 2030

Region	2024 (TWh)	2030 (TWh)	Growth
United States	183	426	+133%
China	65	175	+170%
Europe	64	109	+70%
Japan	19	34	+80%
Rest of World	84	201	+140%
Global Total	**415**	**945**	**+128%**
